Important Price Information

You will receive an introductory natural gas supply price of \$0.88000 per therm for your first 3 billing cycles with us. The introductory natural gas supply price will be listed in your Terms of Service, which is displayed on the application page online as well as in your Welcome Email/Letter.

After the introductory period expires, your prices with us will be variable. We will determine the variable supply price at our discretion based on many different factors, which may include competitive prices, industry charges we are responsible for, applicable state and local taxes, profit margins, or other business conditions. Events beyond the company's control—including fluctuations in weather—may impact the variable price. For your reference, our natural gas charges include natural gas supply and transportation charges, and Sales and Use Tax (SUT), but they do not include any tax, utility distribution charges. Our current and historical prices are not an indicator of our future prices and we do not guarantee any savings. Our prices may be higher than your utility's supply rate.

Comparison is to NRG Home introductory prices. Ongoing variable prices may be higher than the utility supply rate.
